DETAILED ACTION

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 44-60 have been renumbered claims 42-58.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 10-16 drawn to a mail handler featuring method with document type sorting, classified in class 700, subclass 223.
- II. Claims 17-43 drawn to a mail handler and method featuring document transport controller and method, classified in class 700 subclass 228.
- III. Claims 1-9, and 44-58 drawn to a stacked document removal apparatus and method, classified in class 700, subclass 219.

3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as document recognition. See MPEP § 806.05(d). Invention II has separate utility such as a discrete document conveyor feed control. See MPEP § 806.05(d). In the instant case, invention III has separate utility such as removing documents from a stack. See MPEP § 806.05(d).

Art Unit: 3653

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
5. No claims appear to be linking claims.
